# BroadCloud Product Portfolio

Comprehensive Offering for BroadCloud Hosted UC and SIP Trunking Services

AudioCodes offers a comprehensive portfolio of products that complements BroadSoft's BroadCloud hosted communications services. The combination of AudioCodes products and BroadCloud enables service providers to deliver hosted unified communications and SIP trunking to their business customers cost-effectively and with a short time to market.

Key Benefits

- Increased operational efficiency - a single source for all CPEs

- Seamless interoperability for accelerated deployment

- Improved customer retention – reliable, high quality voice with real-time monitoring

SBCs and Gateways for SIP Trunking

AudioCodes Mediant family of session border controllers (SBCs) and gateways is a line of versatile and highly interoperable IP communications platforms that enable smooth connectivity between customers' existing IP-PBX and PBX platforms and the BroadCloud SIP trunking service.

An integrated PacketSmart probe enables real-time quality monitoring across the network.
