

AudioCodes One Voice for Microsoft 365

AudioCodes SBCs and Enhanced Gateways for Skype for Business

AudioCodes Session Border Controllers (SBCs) and Enhanced Gateways offer direct SIP connectivity between existing enterprise voice infrastructure, Skype for Business, the PSTN and SIP trunking services.

The AudioCodes line of Mediant SBCs and Enhanced Gateways provides complete coverage of customer needs with multiple densities, price points and feature set alternatives.

AudioCodes Mediant SBCs are also certified for Microsoft Teams Direct Routing ensuring a smooth migration from Skype for Business without having to replace platforms.

AudioCodes hybrid SBCs offer investment protection by supporting gradual migration from TDM to IP, and from PSTN to SIP Trunking supporting SIP and TDM connectivity on the same hardware platform.
