

## Product Notice #0370

### AudioCodes Routing Manager (ARM) on Microsoft Azure Marketplace

AudioCodes is glad to announce the availability of the AudioCodes Routing Manager (ARM) on Microsoft Azure Marketplace, simplifying the deployment of ARM on Azure.

ARM, an intelligent, centralized routing management solution for enterprise and service provider VoIP networks is now available on the Azure Marketplace, enhancing AudioCodes' offering for customers who are moving their communications infrastructure to the Azure cloud platform. Customers can now build a complete unified communications (UC) ecosystem, including ARM, with a click of a button directly from the Azure Marketplace.

Not only is ARM perfectly suited for centralizing VoIP routing management in Azure, but it is also ideal for hybrid environments where SBCs, media gateways and IP-PBXs are located at customer premises. By centralizing all call routing rules and policies in one centralized network-aware application, ARM helps IT managers save valuable time and money by eliminating the need to apply routing rules and user policies across multiple dispersed locations.

For an overview of ARM on the Azure Marketplace, go to <https://azuremarketplace.microsoft.com/en-us/marketplace/apps/audiocodes.audiocodesarmsolution?tab=Overview>.
