Release of AudioCodes Routing Manager (ARM) Version 10.0.200 for General Availability

Product Notice #0562

We are pleased to announce the release of ARM Software Version 10.0 (10.0.200) for General Availability.

For a full description of the release, click here to download *AudioCodes Routing Manager Release Notes* from AudioCodes' website.

The software for this release is available for download from AudioCodes Services Portal (registered customers only).

Key Features

Enhanced SecureLogix capabilities, all achieved through SIP conditions and manipulation:

- **"Redirect" Action Directive:** In addition to the existing Allow and Block directives, operators can now use a third directive – Redirect. This enables calls to be automatically forwarded to an alternative phone number depending on the value provided by SecureLogix's Orchestra One.

- **Score Embedded in SIP INVITE:** The score from SecureLogix's Orchestra One can now be directly embedded into the outgoing SIP INVITE message.

- **ActionDirective Embedded in SIP INVITE:** The actionDirective from SecureLogix's Orchestra One such as Allow, Block, or Redirect can now be embedded directly into the outgoing SIP INVITE message.

Affected Products

AudioCodes Routing Manager (ARM).

Announcement Date

April 9, 2025
