

# AudioCodes SBCs Receive FIPS 140-3 Certification!

Product Notice #0555

We are delighted to announce that AudioCodes Session Border Controllers (SBCs) have officially achieved **FIPS-140-3 (Federal Information Processing Standards) Certification!**

This certification, issued by the National Institute of Standards and Technology (NIST), confirms the robustness and security of our SBC solutions in handling sensitive data, ensuring compliance with stringent government and industry standards.

With **FIPS-140-3 Validation**, government agencies and other security and privacy sensitive organizations can trust AudioCodes SBCs to enable highly secure real-time communications, meeting the most recent security standards. Notably, AudioCodes SBCs are currently the only SBCs to have achieved this specific certification.

This milestone reflects our unwavering commitment to delivering secure communication solutions.

## Certified Products

- Mediant Virtual Edition (VE) SBC and Mediant Cloud Edition (CE) SBC (Certificate# [4908](#))
